

230

Roll padding

 **MAIER**

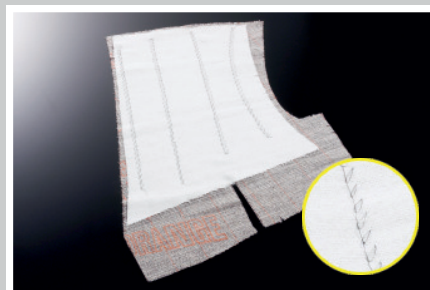

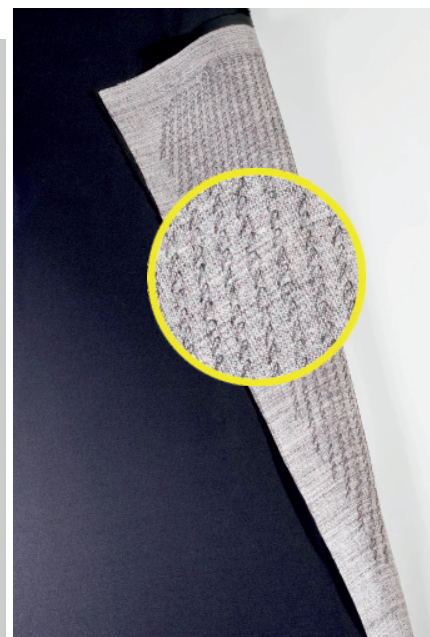

Perfectly rolled lapels for high-quality jackets and coats

Discover the MAIER 230, your ideal solution for roll-padding collars and lapels in the production of high-quality jackets and coats! By using the roll horn as a fabric support, the operator achieves the desired roll effect and fashionable finish.

The vertical arrangement of the plunger and presser feet under the stitch plate ensures precise stitch penetration. The long arm of the MAIER 230 is particularly advantageous for processing coats. The arm and base plate are made from a single casting. This means that the machine runs extremely smoothly even at high speeds.

The optional swiveling table makes the class 230 a universal machine that can also be used for other blind stitch operations, e.g. flat padding of chest piece. Our machine is the ideal choice for many menswear, womenswear and bespoke ateliers.

Options and accessories

Top equipment makes the class 230 the ideal solution for all roll hemming operations.

Mounting kit for motor -46

Simple installation, compact design - the mounting kit for EFKA and Ho-Hsing motors.

Digital stitch depth indicator -D

More efficient, accurate and simple - no more guessing stitch depth. The digital stitch depth display gives you precise control of your stitch depth. Reproducible settings and stepless adjustment.

Thread trimmer -12

Fast, safe and easy - the thread trimmer offers a high level of operating convenience and an impressive rationalization effect. Save valuable time with every seam.

Large add-on work support -35

The large add-on table offers the perfect solution for large-format sewing material. Whether curtains or other large-format sewing projects - with our add-on table you always have enough support surface.

Presserfoot lift -PFL/P

Making work easier! The pneumatic presser foot lift makes sewing much easier. Simply press the foot pedal and the presser foot lowers. You can concentrate fully on your sewing work.

Sewing light -LED

Our high-quality LED sewing light provides bright, even light directly above your sewing area. No more tedious squinting or shadow play - with our light you always have the best view of your sewing project.
