 MAIER

Additional transport
with a puller

Perfection in every seam with our class 251-29/1

Discover the versatility and precision of our MAIER 251-29/1. Achieve professional results in every application!

Thanks to the innovative spring-loaded plunger, the plunger height of the MAIER 251 automatically adapts to the thickness of the fabric. For cross seams or pockets, the plunger is pressed down so that the needle only stitches the top layers of fabric. Our unique stepless adjustment of the plunger spring pressure allows you to set the machine perfectly for any type of fabric.

The result? No unsightly marks on the outside due to stitch-troughs or thread pulling.

Easy handling and fabric loading thanks to the wide-opening presser feet. And the integrated interval device (1:1/1:2) gives you additional flexibility for your sewing work.

Wide opening presser feet make handling and loading the work piece easy. With the swiveling table and a cylinder arm, the MAIER 251-29/1 is versatile in use. The fabric guides included as standard ensure precise guidance of the material for the seam on the hem or at the fabric edge. And the integrated interval device (1:1/1:2) gives you additional flexibility for your sewing work.

With our innovative puller, feeding large workpieces is child's play

Experience the advantages of the puller! Thanks to its perfect position directly behind the stitch plate and its even pulling force, you can feed large workpieces effortlessly. Our puller is the ideal solution for your feeding requirements. Make your work easier and increase your productivity with our reliable helper.

Our puller operates intermittently. The latest stepper motor technology is used to optimize the transport behavior. This ensures smooth and gentle transport, even with difficult materials.

Options and accessories

Mounting kit for motor -46

Simple installation, compact design - the mounting kit for EFKA and Ho-Hsing motors.

Digital stitch depth indicator -D

More efficient, accurate and simple - no more guessing stitch depth. The digital stitch depth display gives you precise control of your stitch depth. Reproducible settings and stepless adjustment.

-D

Thread trimmer -12

Fast, safe and easy - the thread trimmer offers a high level of operating convenience and an impressive rationalization effect. Save valuable time with every seam.

Presserfoot lift -PFL/P

Making work easier! The pneumatic presser foot lift makes sewing much easier. Simply press the foot pedal and the presser foot lowers. You can concentrate fully on your sewing work.

Large add-on work support -35

The large add-on table offers the perfect solution for large-format sewing material. Whether curtains or other large-format sewing projects - with our add-on table you always have enough support surface.

-12

Vertical motion plunger -52

The vertical motion plunger ensures more accurate stitch penetration, even in thick material. Its unique design means it leaves no marks on your material.

For velvet and velour -10

Softer springs, polished sewing tools and a rounded plunger ensure that there are no unsightly marks on your fabric. Best of all, the machine can still be used for normal sewing.

For thick fabric -25

The stitch plate and plunger are specially adapted for processing particularly thick, heavy material.

Sewing light -LED

Our high-quality LED sewing light provides bright, even light directly above your sewing area. No more tedious squinting or shadow play - with our light you always have the best view of your sewing project.

-10

Skip stitch device -1:3

Instead of penetration into the outer fabric layer with every stitch or every second stitch, our -1:3 option allows you to penetrate only every third stitch. The result? Fewer marks and a looser stitch.
