

251-32

Waistband felling

The perfect waistband finish for trousers

Our MAIER 251-32 is the solution for the soft Italian finish with its high level of comfort by attaching the waistband in this manner!

Regardless of whether you want an American finish (seam on the edge of the waistband lining) or a European finish (seam on top of the waistband lining), the MAIER 251-32 allows you to utilize both versions.

Thanks to the innovative spring-loaded plunger, the plunger height of the class 251-32 adapts automatically when sewing over pocket pouches or belt loops. Only the top layer of fabric is stitched. Our unique stepless adjustment of the plunger spring pressure allows you to set the machine perfectly for any type of material.

The arched table and extended presser feet prevent belt loops and pocket bags from getting caught and hindering transport. Wide-opening presser feet make handling and loading the waistband easier.

This sewing machine is not only an expert at attaching waistbands - it also gives you extra flexibility for a wide range of operations. With the swiveling table and a small cylinder arm, the MAIER 251-32 is versatile in use. The fabric guides included as standard ensure precise guidance of the material for the seam on the hem or at the fabric edge. And the integrated interval device (1:1/1:2) gives you additional flexibility for your sewing work.

Options and accessories

Top equipment makes the class 251-32 the ideal solution for all waistband felling applications.

Mounting kit for motor -46

Simple installation, compact design - the mounting kit for EFKA and Ho-Hsing motors.

-D

Digital stitch depth indicator -D

More efficient, accurate and simple - no more guessing stitch depth. The digital stitch depth display gives you precise control of your stitch depth. Reproducible settings and stepless adjustment.

Thread trimmer -12

Fast, safe and easy - the thread trimmer offers a high level of operating convenience and an impressive rationalization effect. Save valuable time with every seam.

-12

Presserfoot lift -PFL/P

Making work easier! The pneumatic presser foot lift makes sewing much easier. Simply press the foot pedal and the presser foot lowers. You can concentrate fully on your sewing work.

Stitch knotting -48

No unravelling of the seam! A knot at the end of the seam prevents the seam from being unintentionally unraveled. The knot is made automatically when the thread is cut.

Programmable electronic stitch depth setting -45/3

Up to 99 different stitch depth values can be stored and recalled individually or in programmed sequences using stepper motor technology. Stitch depth is easily changed using the knee switch or an automatic stitch count.

-48

Vertical motion plunger -52

The vertical motion plunger ensures more accurate stitch penetration, even in thick material. Its unique design means it leaves no marks on your material.

Sewing light -LED

Our high-quality LED sewing light provides bright, even light directly above your sewing area. No more tedious squinting or shadow play - with our light you always have the best view of your sewing project.

Technical Specifications

Stitch description	Single-thread chainstitch
Stitch type	103
Maximum Speed	3000 rpm
Recommended Speed	2200 rpm
Stitch length	3-8 mm, adjustable
Needle System	251EU
Cylinder circumference	22 cm
Work width	17 cm

Packing dimensions head only

Carton 62x45x36 cm
Gross 25,0 kg
Net 21,0 kg

Packing dimensions complete machine

Pallet 110x58x120 cm
Gross 66,0 kg / Net 55,0 kg
Volume weight 117 kg
